Addendum 7 – Virtual Machines

This Virtual Machines Addendum (“Addendum”) sets forth the Supplemental Terms that apply to Your use of the Software on Virtual Machines, and includes the AGI Software License Agreement, which is incorporated herein by reference in its entirety. This Addendum will take precedence over any conflicting terms of the Software License Agreement; it does not take precedent over any conflicting terms in the underlying GSA Schedule Contract or GSA Purchase Order. This Addendum contains those definitions and additional provisions that apply to the use of Virtual Machines.

1. DEFINITIONS

In addition to the definitions provided in the Software License Agreement, the following definitions apply to this Addendum:

“Virtual Machine” (VM) is a software implementation of a machine (i.e. a computer) that executes programs like a physical machine.

2. GRANT OF LICENSE

The following supplements Section 2, Grant of License, of the AGI Software License Agreement. In so much as you may intend to deploy the Software in a virtual environment for the express purposes of maximizing hardware utilization, minimizing maintenance, or providing for disaster recovery:

2.1 You agree to the following:

- a. The use of the Software on a VM is only permitted when used in conjunction with a purchased set of networked licenses served from a remote server;
- b. Each instance of a VM in which the Software is executed will consume a single and unique set of purchased licenses; and
- c. The number of licenses in operation will never exceed the actual number of purchased licenses unless otherwise specifically permitted by written agreement with AGI. AGI may, from time to time, request a certification of the foregoing.

2.2 You shall not:

- a. Utilize a virtual environment in order to serve the Software out to multiple clients in excess of the number of purchased licenses.

2.3 All rights not specifically granted herein or not specifically granted in the AGI Software License Agreement are prohibited.
